

Alex Oshima

📍 San Diego, CA ✉ aoshima@ucsd.edu ☎ 925-286-1297 🔗 in/alex-oshima-70358a237

SUMMARY

A motivated and problem-solving oriented engineer with 3+ years of experience developing statistical and deep machine learning models using PyTorch

EDUCATION

Masters of Science, Electrical Engineering spec. Machine Learning and Data Science

University of California, San Diego • La Jolla, CA • 2025

Bachelor of Science, Computer Engineering

University of California, San Diego • La Jolla, CA • 2024 • 3.85

• Booker Engineering Honors.

EXPERIENCE

Finance And Data Associate

Simplera Benefits

August 2019 - Present, Walnut Creek, CA

- Managed database migration of client data from Zywave to Agency Bloc reducing tool cost by 20%.
- Processed commission statement to insure accurate payments received from over 20 insurance companies on a monthly basis leading to a reduction of missed payments.
- Responsible for maintaining database of client activity, follow up & communications.

PROJECT

Breast Cancer Genomics Research

UCSD • April 2025 - June 2025

- Lead data scientist in group of 6 researchers.
- In charge of the architecture and designing the framework of statistical methods used in the research.
- By outlining the methods for other biology focused researchers increased our ability to delegate tasks more easily. And thus increase efficiency for 5 time constrained research goals.
- Techniques: SVMs, Dimensionality Reduction, Clustering Algorithms.

Authorship Verification Research

UCSD • September 2024 - June 2025

- Explored statistical and deep learning approaches relevant to the field of NLP, such as creating semantic feature vectors as well as designing deep neural nets using transformer architectures.
- Designed models and explored different training methods, including contrastive loss functions with Siamese networks and reinforcement learning.
- Personally in charge of collecting data: 500,000 personal direct messages. As well as working with existing datasets: A million online forum comments from Reddit, Enron Email Dataset.
- Techniques: SVMs, TF-IDF, Doc2Vec, BERT, LDA, Siamese Networks, MLP.

INVOLVEMENT

Assistant Teacher and Tutoring

Various • January 2021 - July 2025

- Assistant teacher at Lincoln Acres Elementary School. Taught struggling students in topics like math.
- Provided one-on-one math tutoring for third grade students.
- Introductory computer science tutoring for high school students.
- Founded and grew a UCSD campus org to over 40 people.

SKILLS

Python, PyTorch, TensorFlow

Authorship Classification and Verification, Natural Language Processing, Transformer Architecture, LLMs, GenAI, Statistical Learning, Dimensional Reduction

Android Studio, JUnit, Dart, Flutter

Java, C#, C++, GIT, GitHub

Object-Oriented Design, Agile Software Development, Mobile Software Development
